### Well Being Message

Developing children's social and emotional skills through play

Play is a way children can express their feelings even before they have the words to say how they feel.

In play children are in charge of what they do. Being in control in play helps them to learn to manage their feelings.

When children make or build things in their play, they are building skills and confidence in themselves.

In play children learn about the give and take of relationships with their friends. They learn to lead and follow and to care for others.

Play helps children to think about what they want to do, to plan and to be patient.

Through play children learn how to mend mistakes and to feel better after things go
