### Attendance

Attendance: Everyday matters in the school life of a child or young person. Each day of attendance has a positive effect on their development and future success.

As early as preschool, regular absence can be a predictor of later attendance patterns. Even missing one day a week of school from reception to year 10 adds up to 2 years and 1 term of schooling.

Long-term studies have shown that not completing school can be linked with poor physical and mental health, poverty and involvement with the criminal justice system.

Children and young people who do not attend school regularly also miss out on planned learning experiences, sequences of instruction and class participation. The impact of this loss is compounded with each absence. It is also more difficult for them to build positive relationships with others.

### Well being Message
